## PROJECTS

#### Todo List (04/2021 - 06/2021)

- Tech Used: Javascript, Html, Css
- I have designed a to do list using front-end developement.
- Individuals can add there task and subtask accordingly.They can also remove their task once it was done.

#### Online Chat Website

- Tech Used: React.js ,Node js,Socket Programming
- I have made online chat websites. We can chat without saving our history.
- User has to first sign in and provide the room if that room exist they will enter there and can exchange information there. otherwise that room will be created and by sharing that room link they can chat with each other.

#### Online saloon Booking (09/2020 - 11/2020)

- Tech Used: Mysql(RDBMS), Node.js , sql.
- Our Team had made an online saloon booking website. For the part of this website they have to register so that we can show their saloon to the customer. Customer can sign in and can find the nearest saloon where for particular work the provided time slot is free.They can also schedule their time according to the convinence.
- We had also provided some special power to the admin.They can add,remove and update the saloon list according to the feedback received from the customers.

## EXPERIENCE
